

Assembly Instructions

RED Lightweight Sling Frame

Assembly

1. Insert fully the four horizontal bars into the X shaped centre connection piece and clamp by tightening the four plastic wing nuts.
2. Insert four vertical tubes (without rubber feet) into the end of each horizontal bar, depress each button clip to engage the tubes and align the holes in the tube with the button clip to lock in position.
3. Insert the remaining four vertical tubes (with rubber feet) into the end of each previously assembled vertical tube, depress each button clip to engage the tubes and align the holes in the tube with the button clip to lock in position.
4. Your **RED** Lightweight frame is now ready for use. For safety and the best possible experience only use **RED** Slings and attachment Accessories.

Disassembly

To disassemble the Frame, simply follow the assembly procedure in reverse.
